Thank you,

xo

I am also open to couples, women, and other trans folks!

As a side note, I often receive messages from people asking about what FTM means or what it means to be Trans, there is nothing wrong with these questions but in order to streamline the process and avoid answering these types pf questions all the time here is a quick glossary/ F.A.Q for you to check out if you are wondering/intrigued but have a limited knowledge of trans people.

FTM- Is an acronym for "Female-To-Male"
Generally, this term is used by transgender men that are, socially and/or medically, transitioning from female to male. Basically, an FtM is someone who was assigned female at birth but does not by any means identify himself with the female gender.

"Where are you in your transition?"

I have chosen to medically transition and I have had top surgery, so this means my chest has been reconstructed to look "more masculine." I have also been on testosterone for about 4 years now.

"What parts do you have?"

Everything below the belt is "original plumbing" so to speak. Some guys are confused when they see my clit in my photos because it is much bigger, this is an effect of testosterone therapy which enlarges your clit and makes it more sensitive!
